Wee Laptop

With laptop computers, a cut in scale typically means a cut in performance. Not so with the 2.2-pound Sony PCG-C1MVPM/C. Sporting a 733MHz TM5800 Crusoe processor, this subnotebook runs Windows XP with ease. Additional features include an 8.95-inch XGA, ultra-wide TFT screen, a 20GB hard drive, a V.90 modem, and an integrated swivel camera.

Sony PCG-C1MVPM/C, US\$1999.99; www.sony.com

Lock 'Em Up

Someone might try to run off with your laptop, but the culprit won't get far with the APC Kryptonite lock. This 5mm, vinyl-coated, braided-steel cable is of the same stuff used in Kryptonite's bicycle products. The additional quick-mount security node and four-digit combination lock make securing your laptop a cinch.

Also available, an 8mm-thick version, for people whose office is on the "sketchy" side of the water cooler.

Set-Top Tandberg

Conduct presentations on the fly with Tandberg's 880 set-top videoconferencing unit. Feature rich, the unit incorporates a slot for a wireless LAN card, enabling wireless operation, and the company's embedded MultiSite feature, which allows the connection of up to 10 video and four audio sites in a single videoconferencing call.

Fits neatly on most standard TVs. Recommended for small to medium conference rooms.

Tandberg 880, contact Tandberg for pricing information, 800.538.2884; www.tandbergusa.com.
