## Bionic Mouse

The BioLink U-Match mouse is a standard two-button mouse with scroll wheel and a James Bond twist. A small fingerprint scanning device, utilizing advanced optics, reads a user's thumbprint before providing access to local networks or Internet sites. Compatible with all Microsoft and Novell networks. Stores up to 10 thumbprints.

## Shiny New Apple

Apple's done it again with the new iMac, a complete reworking of the groundbreaking original. Gone is the translucent, candy-colored pod, in favor of a 15-inch flat panel display and a compact 10.6-inch base that houses an 800MHZ G4 processor, an optional SuperDrive that reads and burns both CDs and DVDs, and the high-powered NVIDIA Gforce2 MX graphics chip.

## Secret Stash

Now there's something safer than storing your passwords on a 3x5 card. The ebp<sup>lite</sup> Personal Password Manager stores 20 passwords, phone numbers, or security codes in a discreet key-chain-sized device. Features include a built-in password, prompts to change passwords at preset intervals, and a self-destruct feature should your ebp<sup>lite</sup> fall into the wrong hands.

## Sitting in Coach

The Leap Chair Coach edition from Steelcase adds further refinement to the popular original.

Amenities include adjustments for upper and lower back tension, seat edge angle and depth, as well as height, width, and pivot. Unique to the Coach edition is a polished aluminum frame; see-through arms; and, of course, Coach leather in six different colors and two stitching styles.
