

INGEAR

Speedy Delivery

Enjoy wireless high-speed data and voice delivery with Sprint's PCS connection card. Weighing in at 1 ounce (minus the separate battery pack), this card is an easy way to soup up your PDA or notebook.

Monthly service charges run US\$100 for unlimited data transfer and 20 cents per minute for voice calls.

Olympic Recorder

When you're at a loss for words, try a picture. The W-10 digital voice recorder is equipped with a built-in digital camera. A 16MB memory capacity lets you record up to 180 minutes of audio or 250 images with 24-bit color. Connection to a PC is handled by a USB port.

More to the Point

A brushed-steel finish highlights impeccable ergonomic design in a remote pointer that's as polished as your PowerPoint presentations. Icon-studded control keys let you manipulate slides by feel, and a 50-foot RF wireless range lets you make your point from a distance.

Grand Clié

It may cost more than some PCs, but measure this PDA's price against its list of features and US\$800 begins to look like a bargain. A 200-MHz processor and Palm OS 5.0 keep it current internally, but its top-notch 2-megapixel camera, rechargeable lithium-ion battery, integrated Bluetooth, and flip-and-twist display set it apart from the competition.
